

MANIDEEP GRANDHE

Senior Software Engineer

Northlake, TX 76226 • (703) 623-1121 • manideepgrandhe@gmail.com

PROFESSIONAL SUMMARY

Senior Software Engineer with 11+ years of experience architecting and delivering scalable full-stack solutions in Healthcare IT. Proven expertise in building complex web applications with Java, React, TypeScript, and Ruby on Rails. Implementing AI-powered semantic search with RESTful services for semantic objects and modernizing legacy systems. Proficient in accessibility standards and agile methodologies with a deep understanding of the software development lifecycle.

PROFESSIONAL EXPERIENCE

Software Developer 2 (IC2)

Oracle Corporation • Kansas City, MO • October 2022 - Present

- Architected modular healthcare scheduling platform, building reusable UI components with Oracle JET (OJET), TypeScript, and React through component library standardization
- Designed semantic objects and metadata schemas for Vector Database storage, implementing AI-powered semantic search that improved appointment discovery accuracy and reduced search time
- Implemented OpenAPI-based service integrations for real-time appointment actions with high reliability and fast response times
- Modernized legacy Revenue Cycle applications by migrating to React and Oracle APEX, achieving faster page load times and full WCAG accessibility compliance

Senior Software Engineer

Cerner Corporation • Kansas City, MO • April 2018 - September 2022

- Enhanced functionality and incorporated new features into existing healthcare applications for global markets
- Designed and upheld web components for appointment workflows utilizing React and Ruby on Rails
- Worked closely with product and UX teams to define requirements and deliver user-centric features, while fostering team growth through code reviews and technical discussions
- Conducted thorough debugging and root cause analysis to identify and fix critical defects, reducing issue recurrence and enhancing system reliability

Software Engineer

Vista Applied Solutions Group Inc. (Client: Cerner) • Kansas City, MO • July 2015 - March 2018

- Developed core features for PHYSDOC and Revenue Cycle applications processing healthcare transactions for major hospital systems
- Built scalable Ruby on Rails APIs with React-Redux frontend, implementing token-based authentication and role-based access control

- Established React project foundation for new clients including component library and deployment pipelines
- Architected bidirectional communication layer between React and Spring Boot using WebSockets for real-time data synchronization
- Developed responsive UI components with comprehensive unit tests, ensuring cross-browser compatibility

Software Engineer

Vista Applied Solutions Group Inc. (Client: Deloitte) • Camp Hill, PA • January 2015 - June 2015

- Engineered web application for Maryland Health Information Exchange supporting ACA implementation
- Developed enterprise application using Hibernate, Spring MVC, and SOAP/REST web services, integrating with external insurance carrier systems
- Optimized database performance by developing efficient stored procedures and triggers using PL/SQL on Oracle
- Delivered proof-of-concept application for Kentucky Health Department claims processing system

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, React, Ruby, Groovy, Gherkins

Frontend: React, TypeScript, Node.js, HTML5, CSS3, jQuery, Oracle JET (OJET), Terra (Cerner)

Backend & APIs: RESTful APIs, OpenAPI, Microservices, Hibernate

Databases: Oracle, Vector Databases, MySQL, PostgreSQL, PL/SQL

DevOps & Tools: Kubernetes, Docker, Helm, Jenkins, CI/CD, Git, GitHub

Testing: JUnit, Mockito, Selenium, Playwright, Rspec, WCAG, Jest, Jasmine, JBehave, Cucumber

Other: Agile/Scrum, VS Code, IntelliJ, Eclipse-RCP, Ruby Mine

EDUCATION

Master of Science in Computer Science • GPA: 3.33/4.0

University of Central Missouri, Warrensburg, MO • 2014

Bachelor of Technology in Computer Science

Jawaharlal Nehru Technological University, Hyderabad, India • 2013
